

Construction Safety Training

A positive health and safety culture comes from sound knowledge base which is not inherited, but must be acquired either by trial and error or from a reputed source of expertise. Trial and error methods extract huge prices in construction work, where consequences of errors may be very serious. Therefore tailor made safety training can help you avoid learning from costly mistakes.

With the extensive experience gained in hundreds of construction projects and a multidisciplinary team of experts, Cholamandalam MS Risk Services is a reliable global provider of value added services during all phases of a project.

Our trainer's specialized in delivering health & safety training. Two decade of experience in delivering courses to the corporate world.
