

Conservation and management of biological diversity is our responsibility. Biodiversity underlies all the ecosystem processes and forms a vital function to maintain ecological balance. The flora and fauna have intrinsic worth to ecosystems, and assessing their diversity for their status and trends holds valuable for sustainable development for planning and execution of developmental projects.

Chola MS Risk having 25 plus years of risk management consulting experience, partners with our clients in transforming the facility from a basic compliance to ESG stewardship.

## Biodiversity Management Services (BMS)

### Importance of BMS

- Understand the economic value of species diversity
- Acknowledging the cultural importance of species to the region
- Recognize the ecological services to maintain balance
- Appreciate human-nature relation
- Sustain species survival and endemism

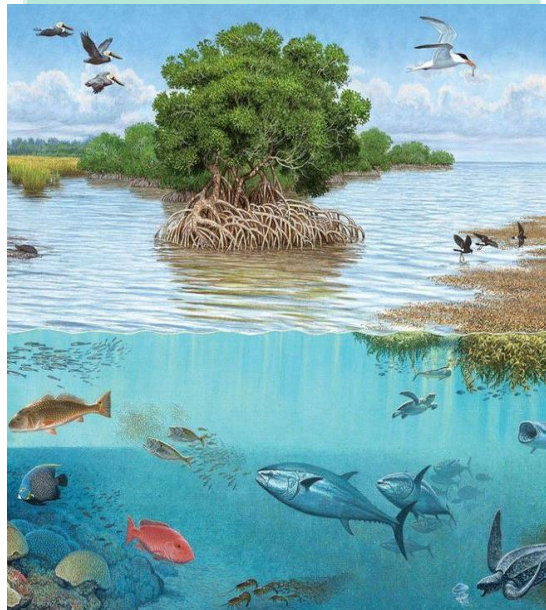

## Characterization of Habitat & Ecosystems

- Delineation of habitats and ecosystems
- Floral & Faunal Species Identification
- Assessment of associate species
- Umbrella & Keystone Species identification
- Establishing Habitat Diversity
- Assess contiguity of fragmented habitat of an ecosystem

**Know Your Ecosystems**

## Biodiversity Enhancement & Management

- Identification and conservation of keystone species
- Identification of impact receptors
- Impact mitigation measures
- Perception of indigenous knowledge of species diversity and value
- Establishing zones based on species diversity and sensitivity

**Conserve Nature to Sustain Our Being**

## We Can Help You With

- Formulation of ecosystem based biodiversity management strategy
- Assessment of Ecologically Sensitive Areas
- Micro-level Forest Diversity Management
- Assessment of Terrestrial & Coastal Habitats
