

Businesses around the world are increasingly trying to implement international standard that specifies requirements for an effective environmental management system (EMS) that an organization can use to enhance its environmental performance .

Chola MS Risk Services team has accomplished the skill of developing realistic and more prudent risk based environmental management programs that can minimize the business continuity risks due to residual and hidden environmental risks.

Innovating to succeed

A risk based environmental management systems approach helps facilities to identify environmental aspects, associated risks and opportunities to adopt a robust and sustainable environmental management program to avoid any business continuity risks.
