- Municipal solid waste management rules 2016,
- Hazardous and other waste management rules 2016,
- Biomedical waste management rules,
- Plastic Waste Management Rules,
- E-Waste Management Rules,
- Battery Waste Management Rules
- Construction and demolition waste rules,
- Fly ash utilization rules for power plants

Common Challenges of Waste Management Programs

- Source segregation
- Valuing the wealth of waste
- Selection and implementation of waste segregation programs
- Operation and maintenance costs
- Identification of recycling markets
- Quantifying and reporting the solid waste management program outcomes

Innovating to succeed

Design related services

- Material flow and consumption studies,
- Waste audits and waste characterization studies,
- Pollution prevention studies to minimize the waste generation at source,
- Detailed waste management technical feasibility studies and developing strategies

Zero Waste to Landfill

**Global Thinking
Local Delivery**

Zero to Landfill Services

- Evaluation of the existing waste management system and its maturity,
- Waste generation mapping and characterization,
- Developing a sustainable SWM program
- Design of material recovery facilities, recycling and composting facilities,
- Review and auditing of hazardous waste treatment facilities,
- Developing tender documents,
- Assisting in implementation of waste management programs.
